

WPATHGEI GLOBAL EDUCATION INSTITUTE

WORLD PROFESSIONAL ASSOCIATION FOR TRANSGENDER HEALTH

The Certification & Mentorship Committee is dedicated to ensuring that members meet/continue to meet the requirements to obtain/maintain their WPATH GEI certification. The Committee will review and monitor the mentoring process of members through their individual and group mentorship agreements.

The Committee’s goal also parallels GEI’s mission to increase access to competent compassionate clinicians worldwide. The Certification & Mentorship Committee will work to expand the GEI Certification program globally by making connections to/collaborating with providers and community organizations.

The Curriculum Development Committee will focus on establishing the core curricular components for GEI trainings about transgender healthcare. The GEI curriculum framework is based on a set of four competency domains that have global applicability: Patient/Client-Caregiver Relationship; Content Knowledge; Interdisciplinary Practice; and Professional Responsibility.

Committee work will include establishing objectives that map to the standardized competency-based framework such that essential content provided to attendees will be consistent across trainers. The Committee’s work will serve to assist trainers by maintaining educational resources. The committee will also work to update core curricular components to remain consistent with the incoming SOC8 and with new literature in the field as it emerges.

The Faculty Development Committee will identify qualified individuals who are interested in teaching healthcare professionals to work with the trans/gender diverse community. Our goal is to increase faculty diversity of all forms (gender identity, race, region, age, sexual orientation, neurodiversity, ethnicity, faith/spirituality, and more). The WPATH GEI curriculum is the basis of the material that faculty use in their presentations.

The Fundraising & Grant Writing Committee will support and advance the interests of WPATH and GEI through generating additional revenue streams. Our goal is to create a long-term, sustainable platform to further the Association’s educational goals and objectives by seeking funding opportunities and preparing/reviewing grant applications. The committee will develop boilerplate language on behalf of WPATH/GEI to facilitate funding opportunities.
