The WPATH GEI SOC7 Certification Program is an optional benefit to our members that signifies a provider is a WPATH member in good standing who has completed an additional rigorous educational curriculum specific to the most current Standards of Care. The certification indicates that the provider has a working understanding of the multidisciplinary care team and the translation of the Standards into practice. The extensive 50 -hour core competencies-based training program includes course work, mentorship and a minimum membership requirement before passing a certification exam. WPATH certification rewards those members who are committing to stay on top of both the current evidence and consensus in the field through continuing education.
