Transgender Health from Global Perspectives

February 14 -18, 2014
Anantara Bangkok Riverside Hotel
257/1-3 Charoennakorn Road
Thonburi, Bangkok 10600, Thailand

University of Minnesota Continuing Education Units (CEUs) will be offered for the WPATH Symposium for a small fee. The CEU is an internationally recognized unit of measurement for participation in noncredit, continuing education programs. Adults who participate in University of Minnesota programs that award CEUs will have a permanent University record of the CEUs they have received through such participation.
Dear Colleagues,

On behalf of the organizing committee and the society of Plastic and Reconstructive Surgeons of Thailand, I would like to welcome you all to the 23rd WPATH Biennial Symposium “Transgender Health from Global Perspectives” on February 14th -18th, 2014, at the Anantara Bangkok Riverside Hotel, Bangkok, Thailand, the first WPATH Symposium to be held in Asia.

This is an opportunity to bring together diverse professionals dedicated to developing best practices and supportive policies worldwide that promote health, research, education, respect, dignity, and equality for transgender, transsexual, and gender-variant people in all cultural settings, which is the WPATH vision statement.

Apart from the scientific program, I hope you enjoy visiting Bangkok. Bangkok has had great success in combining the ancient and modern world together. It offers visitors the opportunity to experience fascinating glimpses of Thailand’s gentle culture amidst the bustle of a great dynamic metropolis. Thailand also has many tourist attractions, ranging from the mountainous North to the beautiful stretches of empty beaches to the East and the South of Thailand. I hope that you all do have an interesting and enjoyable experience during this symposium.

Sincerely yours,

Preecha Tiewtranon, MD
Associate Professor
Local Organizing Chair
23rd WPATH Symposium, Bangkok, Thailand
Dear WPATH friends,

It is my great personal pleasure to welcome you to the WPATH 23rd Symposium in Bangkok, Thailand. With its warm and friendly people, Thailand is known as the “land of smiles”. We’re so very fortunate to receive the world-famous Thai hospitality.

This is the first time that WPATH has convened outside of WENA (Western Europe, North America), and we couldn’t have found a more lovely location. This conference grew from the suggestion, by surgeon Dr. Stan Monstrey at the Oslo Symposium in 2009, that we ask Dr. Preecha Tiewtranon if he would be interested in chairing the next symposium. He accepted, and here we are!

This symposium is consistent with our strategic plan to become a truly international organization, and this year’s theme is “Transgender Health From Global Perspectives”. We are at a tipping point for our organization in size and influence. We are welcoming colleagues from nine countries in Asia and the subcontinent, as well as Australia and New Zealand, three countries in Latin America, one each in Africa and the Middle East, and an astounding 13 countries in Europe. We are even expecting four attendees from Iceland. We are gratified that the numbers from North America remain stellar. We expect a record-breaking number of attendees at this conference.

We offer the latest international science and research consistent with the global perspective theme. Our plenary speakers hail from Thailand (2) Europe (2), Australia and Canada, covering the following topics: Development of Sex-Reassignment Surgery in Thailand, with Preecha Tiewtranon MD; Experience of Uterus Transplantation From Mothers to Daughters, with Liza Johannesson MD, PhD; Co-Dependency as a Way of Life, with Louis Gooren MD; ICD Plenary, moderated by Gail Knudson MD; The Brain of Transsexual Persons, with Antonio Guillamon MD; and A Brief History of the Thai Kathoey: Behind the Myths and Stereotypes, with Peter Jackson PhD. We also have a special, four-part program organized by Board Member Sam Winter PhD and sponsored by UNAIDS, UNDP, WHO and UN Women, entitled “Trans People in Asia and the Pacific”, which provides unique opportunities for interaction between WPATH members and trans health workers in Asia.

The most important part of any conference is, of course, its people, and we have 450 delegates representing surgery, endocrinology, law, human rights, voice therapy, psychiatry, psychology, medical education and social work. One of the special aspects of WPATH is our interdisciplinary nature, and this conference is an opportunity for us to learn from, enjoy and network with colleagues from around the globe.

Aside from the exciting science and the people who are here, Bangkok is a glorious city. There is much to do—before and after the conference. The conference is situated at the beautiful Anantara Bangkok Riverside Resort and Spa, selected for its intimate setting away from the hustle and bustle, but with ample opportunity to see the sights.
We are very grateful to our local organizing committee: Ajarn Preecha Tiewtranon (Chair), Dr. Apichai Angspatt (Co-Chair), Mr. Pongsakorn Wittayaprichakul “Ake”, Ms. Thitima Singchoowong “Mui”, and our translator, WPATH member Dr. Varunee Faii Sangganjanavanich “Faii”. They’re a gracious and competent team.

We are also honored that Dr. Narong Sahametatapat, Permanent Secretary, the Ministry of Public Health, will preside over the opening of the Congress.

I would like to add a special thanks to our Scientific Co-Chairs Drs. Vin Tangpricha and Stan Monstrey, and to our office staff, Executive Director Bean Robinson, Program Coordinator Jeff Whitman, and Executive Administrator Andrea Martin.

Welcome to Bangkok and the WPATH 23rd Symposium. Learn and enjoy!

With appreciation for all you do,

Special Session Series:
Trans-People in Asia & the Pacific

This is a group of four sessions providing a chance for conference attendees to hear trans people from Asia and the Pacific talking about their work in trans health. We expect that up to around 20 individuals, drawn from as far afield as South Asia and the Pacific Islands, will share information about their communities, the cultural, social and legal environments in which they live, and the gender affirmative, general and sexual health and healthcare issues that concern those communities. They will also talk about some of the more interesting and important initiatives happening in each of these areas, in many cases with the involvement of, or input from, their communities. One session will focus exclusively on trans men’s issues.

All sessions will schedule discussion time. Community partners for this series are: Thai Transgender Alliance; Asia-Pacific Transgender Network; and Global Action for Trans* Equality.

Support for this series is provided by UNAIDS, UNDP, WHO and UN Women.
